INTRODUCTION

**Full Stack Developer** with over **8 years of experience** specializing in scalable web architectures, **AI-driven automation**, and API integration. Expert in streamlining the development lifecycle by implementing **AI tools and automated CI/CD pipelines** to solve complex challenges. Proven track record of high-impact delivery, including a user onboarding overhaul that **increased new signups by 400%** and optimizing platforms for a **500x increase in site traffic**.

SOFTWARE SKILLS

Expert Proficiency

- **Frontend:** React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), and Astro.
- **Backend & Runtime:** Node.js (Nest.js/Express), Bun, Deno, and Astro Actions.
- **State & Data:** Zustand, Redux Toolkit, Drizzle ORM, Prisma, and Sanity.io (GROQ).
- **Styling & UI:** Tailwind CSS, Shadcn UI, Chakra UI, and SASS/SCSS.

Advanced & Deployment

- **Cloud & Infrastructure:** AWS, Azure, GCP, DigitalOcean, Vercel, and Cloudflare (D1/R2/Workers).
- **Databases:** PostgreSQL, MySQL, Redis, MongoDB, and Minio.
- **DevOps & Automation:** Docker, Kubernetes, Podman, Dokploy, CI/CD Pipelines, and VPS Management.

Mobile & Cross-Platform

- **Development:** React Native (Expo Workflow) and Flutter.

WORK EXPERIENCE

PILLAR OIL LIMITED | LEAD SOFTWARE ENGINEER

- **Architected** a contract bidding and FX platform using **Astro** and **React.js** with **Island Architecture** for high-performance product integration.
- **Engineered** a secure API ecosystem and utilized **Astro Actions**, endpoints, and middleware to streamline internal data processing.
- **Leveraged** a robust tech stack including **Docker**, **Postgres**, **Redis**, and **Minio** to manage large-scale data.
- **Delivered** massive growth by onboarding 100+ vendors and achieving a **400% increase in new registrations** within the first month.

DECKARDTYLER LIMITED | IT SUPPORT SPECIALIST

- **Executed** a full infrastructure migration from **WordPress** to a **de-coupled architecture** using **Next.js (App Router)** and **Sanity.io**.
- **Scaled** organic site traffic by **500x** through advanced SEO strategies and **GROQ** query optimization for fast-loading pages.
- **Maintained 99.9% uptime** for critical email systems and web infrastructure, ensuring zero business disruption during peak traffic.
- **Enhanced** brand awareness by modernizing digital touchpoints to be aesthetically pleasing and secure.

SEMMS GROUP | IT PROJECT MANAGER

- **Configured** complex IT systems and **VPS servers** for internal applications and custom DNS management.
- **Standardized** user onboarding by creating instructional videos and technical documentation for system management.
- **Defined** project objectives and led the installation of critical hosting infrastructure.

KEY PROJECTS

- **Internal FX & Bidding Platform:** Engineered a secure system using Astro and React.js. Utilized Docker and Redis for scalable data management, leading to 100+ onboarded vendors.
- **Decoupled Web Architecture:** Orchestrated a full migration to a Next.js/Sanity.io stack, utilizing GROQ for automated content queries and achieving massive traffic scaling.

EDUCATION

- **BA, Computer Science & Management** | Wisconsin Int'l University College, Ghana (2014)
- **Pre-Degree, Mechanical Engineering** | Nnamdi Azikiwe University, Nigeria (2010)

INDUSTRY EXPERTISE & SPECIALIZATIONS

- **Core Expertise:** Full Stack Web Development, Scalable API Design (REST/GraphQL), and AI-Driven Automation.
- **Systems & Architecture:** Enterprise Resource Planning (ERP), Microservices, Island Architecture, and Linux System Administration.
- **Strategic Impact:** AI Adoption, Project Management, SEO Optimization, and Open Source Contributions.
