

DTYL DMS Quick Reference

Your guide to file sharing, collaboration, and daily workflows.

1. The Basics & App Access

- **Download Apps:** Get the Desktop & Mobile apps via nextcloud.com/install or search "Nextcloud" in app stores.
- **Connecting Apps:** Open the app, click "Log In", enter our DTYL DMS server URL, and log in to authorize the device.
- **Virtual Files:** Right-click files in your local sync folder to "Free up space" (keep in cloud) or "Always keep on this device".
- **Cross-Device Sync:** Files saved or edited on your Desktop sync instantly to the server and appear on your Mobile app. You can also use the Mobile app to auto-upload documents/photos seamlessly back to your desktop workspace.

2. File Sharing Mastery

- **Internal Sharing:** Click the [Share](#) icon next to a file. Type a teammate's name to grant access instantly.
- **Public Links:** Select "Share link" to create a URL for external clients. Always set an **Expiration Date**.
- **File Drop (Receive Files):** Create an empty folder, share via public link, click the dots (...), and select "File drop (upload only)".
- **Versioning:** Go to the right sidebar of any file and click "Versions" to restore previous saves.

4. Communication & Tools

- **DTYL DMS Mail:** Click the Mail icon to access your integrated inbox. Use the following details to connect your email to other mail clients:

IMAP: us2.imap.mailhostbox.com
(Port: 993)
SMTP: us2.smtp.mailhostbox.com
(Port: 587)

- **DTYL DMS Talk:** Use this for quick internal chats and video calls. You can share your screen right from the browser.
- **DTYL DMS Deck:** Project management boards.
 - Create cards in "To Do", "Doing", "Done".
 - Assign cards to team members.
 - Attach DTYL files directly to task cards.

5. Security Protocol

- **Two-Factor Authentication:** Go to Settings > Security to enable 2FA using an authenticator app.
- **Device Management:** In Security settings, review "Devices & sessions". Revoke access to lost or old devices immediately.
- **App Passwords:** Generate a specific "App Password" in Security settings when logging into mobile/desktop apps for the first time.

3. Co-Editing & Office

- **Real-time Editing:** Click any document or spreadsheet to open it in the browser. Multiple members can type simultaneously.
- **Comments:** Use the sidebar to leave notes or @mention a teammate.

6. Daily Best Practices

- Don't download sensitive files to unmanaged devices.
- Keep folder structures organized with descriptive names (e.g., *"ClientA_Q3_Assets"*).
- If sync conflicts occur, check the web interface for the most up-to-date "source of truth".
